Applications Developed

Career Assistant - [Live](#) | [GitHub](#)

- Job application management system designed to help organize job hunting.
- Performed the role of project manager: duties involed reviewing all incoming code on **GitHub**, tested new code locally on computer before merging to main code, then deploying on both the devlopment and live site on the domain.
- Utilized **AWS** and **Ubuntu** to manage the server site for domain hosting.
- Using **MySQL**, a database was established to hold all incoming frontend data.
- Utilized **PHP** to handle client and server communication for taking in data from user and sending back the requested info based on unique accounts.
- Using **React**, **Redux**, and **Materialize CSS**, the front end was built to let the user or guest add job applications they want to track based on form inputs.

Wicked Sales - [Live](#) | [GitHub](#)

- E-commerce site with user cart and products for consumer shopping needs.
- Utilized React, Redux, and Materialize CSS to build the front end user design and functionaity for generic merchandise shopping and cart managerment.
- Utilized MySQL as the database to store product and user cart information.
- Applied updates to user data and retrieved account information using PHP as back end endpoints and **Axios** for front end client requests.

Pokemon Stay - [Live](#) | [GitHub](#)

- Memory match card game based on the original 151 Pokemon series.
- Using **JavaScript ES5** and **jQuery**, randomized pokemon were generated on the DOM for users to make matches and add them to their collection.
- Employed browser **local storage** to hold each unique user's specific collection that would update when a new match is made and be shown on app start.
- Applied custom **CSS** animations and multiple nostalgic pokemon sound and music files to create a fun and interactive atmostphere for the user.

Work History

The Cambridge Network - Program Associate

Orange, CA

08/2014 - 06/2017

- Administrative assistant role that handled management and customer support for an international education company that brought foreign students into american school systems and provided homestays with local families.
- Trained new and old employees on job programs, tools, and the database.
- Created and compiled documentation for company to keep track of progress and helpful database shortcuts and protocols to improve work efficiency.

Hobbies

- My interest in coding stems from my love of video games and technology. I have built my own desktop and enjoy spending my time playing pc and PS4 games.

Technical Skills

Strong

- Javascript: ES5 & ES6
- HTML5
- CSS3
- jQuery
- AJAX
- Axios
- APIs
- MySQL
- PHP
- Redux
- AWS
- Ubuntu

Experienced

- Materialize CSS
- Node.js
- Express
- Bootstrap
- Flexbox

Tools

- Git
 - GitHub
 - VS Code
 - Postman
 - Meistertask
 - DB Designer
 - Figma
-

Education

Cal State Long Beach

Long Beach, CA

Bachelors of Arts: Psychology

LearningFuze

Irvine, CA

Accelerated Coding Program
